

## The Seven Core Functions of Tribal Epidemiology Centers

TECs carry out their shared mission by identifying health risks, strengthening public health capacity, and developing solutions for disease prevention and control. Per the Indian Health Care Improvement Act, TECs perform the following seven core functions:

1. Collecting data and monitoring health;
2. Evaluating data and health care delivery systems;
3. Identifying health priorities;
4. Making recommendations for health service needs;
5. Making recommendations for improving health care delivery systems;
6. Providing epidemiologic and other technical assistance; and
7. Providing disease surveillance.

## What is a TEC?

**A TEC is a  
Tribal Epidemiology Center.**

There are 12 TECs located across the U.S., offering epidemiologic and public health support to American Indian and Alaska Native communities, Tribes, Tribal organizations, and urban Indian organizations.

All 12 TECs share the mission to improve the health of American Indian and Alaska Native people.
